However, I want the splash screen to fade to black (effectively having a timeout), rather than just disappearing, which is what happens now. I tried setting the duration to 10 seconds, but that seemed to have no effect. I am trying to achieve the following: Current behaviour: my splash screen disappears Desired behaviour: splash screen fades to black and loads splash screen again Is there any way I can do this? A: Is there any way I can do this? Yes. You could use the Expo splash screen, the React Native one. The issue you were experiencing is that the Expo splash screen was disappearing almost immediately when using the version with Expo. As you don't need the Expo app to run, this is perfectly fine. If you need to add a splash screen, I'd recommend using the React Native one. It's extremely well documented and works flawlessly. If you're planning to build a native iOS version, I'd recommend not using the React Native one, and just using the Expo iOS splash screen, or Apple's own, depending on whether you want to support iOS 8 or 11, as they use a different splash screen implementation (both of which are documented on Apple's 2d92ce491b
